

## List of Contents

Volume 5 Number 1

1989

### Contents

#### *Papers*

K. PREISS and O. SHAI

1 Process planning by logic programming

P. BISON, E. PAGELLO  
and G. TRAINITO

11 VML: an intermediate language for robot programming

P. FREEDMAN, C. MICHAUD,  
G. CARAYANNIS and A. MALOWANY

21 A database design for the runtime environment of a robotic workcell

Y. KOREN and A. LOWY

33 Capturing the design of mechanical components in VLSIs

S. H. KIM

43 An automata-theoretic framework for intelligent systems

R. U. AYRES and J. L. FUNK

53 The role of machine sensing in CIM

C. ZHOU and P. J. EGBELU

73 Scheduling in a manufacturing shop with sequence-dependent setups

B. POURBABAI

83 Effects of control strategies on the transient performance of an integrated manufacturing system

91 Book Review

i New Patents

I Software Survey Section

Volume 5 Number 2/3

1989

International Conference on Robotics, Dubrovnik, Yugoslavia, 1987

### Contents

V. R. MILAČIĆ

93 Preface

#### *Papers*

J. HATVANY\*

95 What makes robots tick?

V. MILAČIĆ, M. VUKOBRAZOVIĆ  
and D. MILUTINOVIC

99 Yugoslav research and development program in robotics for CIM

I. RATKOVIĆ, D. ANTONIĆ,  
N. BARBUTOV and N. BAKIJA

109 VERO-ER1 educational minirobot: characteristics and applications

J. R. HEWIT

119 Twin active force control for robots with flexible transmissions

V. POTKONJAK

123 Contribution to the analysis of elastic oscillations of controlled articulated systems

## List of Contents

|   |   |
|---|---|
| T. MARILIER and J. A. RICHARD                     | 129 Non-linear mechanic and electric behavior of a robot axis with a "harmonic-drive" gear        |
| V. POTKONJAK                                      | 137 Thermal analysis and dynamic capabilities of DC motors in industrial robotic systems          |
| A. KURTOGLU                                       | 145 Holographic measurement of industrial robots  |
| K. WANG and T. K. LIEN                            | 153 The structure design and kinematics of a robot manipulator—I. Theory                          |
| K. WANG and T. K. LIEN                            | 159 Closed form solution for the inverse kinematics of a PUMA robot manipulator—II. Demonstration |
| D. M. STOKIĆ and<br>M. K. VUKOBRAZOVIĆ            | 165 Robust control of a multirobot system   |
| G. PRITSCHOW and G. GRUHLER                       | 173 Automatic programming of industrial robots by sensor guidance                                 |
| Z. TAHA and P. J. DRAZAN                          | 183 Optimal decoupled control of a robot  |
| Y. DAVIDOR and B. L. DAVIES                       | 191 Criteria for robot performance in path-following activities                                   |
| G. S. BOLMSJÖ                                     | 199 Programming robot systems for arc welding in small series production                          |
| M. IECHER, P. PINELLO and G. ULIVI                | 207 An interface system between an industrial robot and a multimicro process computer             |
| K. WANG and T. K. LIEN                            | 215 The planning of a straight line trajectory via interactive computer graphics                  |
| T. HONDA, S. KANEKO, S. IGARASHI<br>and Y. FUJIIE | 223 A robot language for parts handling based on hierarchical structure of verbs                  |
| E. NIEMI and B. J. DAVIES                         | 229 Simulation of an optimizing FMS-cell control system   |
| J. LENARČIĆ, U. STANIĆ and P. OBLAK               | 235 Some kinematic considerations for the design of robot manipulators                            |
| B. ILIĆ, B. LAZIC and S. SCREĆKOVIĆ               | 243 Local area network in flexible manufacturing systems  |
| V. R. MILAČIĆ and G. D. PUTNIK                    | 249 Steering rules for AGV based on primitive function and elementary movement control            |
| D. BEKRIĆ and M. ŠARENAC                          | 255 Analysis of trajectories in the technologic scheme of a robotized working place               |
| R. TOMOVIĆ  | 261 Transfer of motor skills to machines  |
| M. RAKIĆ  | 269 Multifingered robot hand with selfadaptability  |
|   | 277 Announcements   |

## I Software Survey Section

## Simulation Software for Robotics

## Contents

J. D. LEE

279 Preface

*Papers*K. PERLIN, J. W. DEMMEL and  
P. K. WRIGHT

281 Simulation software for the Utah/MIT dextrous hand

H. ASADA and M. KITAGAWA

293 Kinematic analysis and planning for form closure grasps by  
robotic hands

S. CETINKUNT and W. J. BOOK

301 Symbolic modeling and dynamic simulation of robotic  
manipulators with compliant links and joints

M. VIDYASAGAR

311 SFPACK—an interactive environment for control system  
analysis and synthesis

R. S. GOMPERTZ and D. C. H. YANG

321 Performance evaluation of dynamically linearized and  
kinematically redundant planar manipulatorsJ. D. LEE, J. S. ALBUS,  
N. G. DAGALAKIS and T. TSAI

333 Computer simulation of a parallel link manipulator

K. YOUSSEF-TOUMI and J. H. BUITRAGO

343 Design and implementation of robot-operated adaptable and  
modular fixturesK. YOUSSEF-TOUMI, J. J. BAUSCH and  
S. J. BLACKER

357 Automated setup and reconfiguration for modular fixturing

A. FIELDS, K. YOUSSEF-TOUMI and  
H. ASADA371 Flexible fixturing and automatic drilling of sheet metal parts  
using a robot manipulator
